

Cimaware Officefix 6 Activation Code alenrex

) A: When you right click on a component, there is an option called 'Unicode Support' (which can be found in 'Resources' as well as 'Project'). I usually make this setting on project specific basis. That way I can have different versions of an application (eg different target platforms) to have different unicode support settings for each. EDIT: I would suggest you try the following if you still have issues: Use the following to convert your files to UTF-8: import java.nio.charset.Charset; import java.nio.charset.StandardCharsets; import java.io.IOException; import java.io.InputStreamReader; import java.io.UnsupportedEncodingException; public class Streams { public static void main(String[] args) throws UnsupportedEncodingException, IOException { Charset utf8 = StandardCharsets.UTF_8; InputStream in = null; OutputStream out = null; try { in = Files.newInputStream("D:\\files\\code\\excel_code\\test.xlsx"); out = Files.newOutputStream(".\\test.xlsx"); copyStream(in, out); } finally { if (in != null) in.close(); if (out != null) out.close(); } } public static void copyStream(InputStream in, OutputStream out) throws IOException { byte[] buf = new byte[256]; int len; while ((len = in.read(buf)) != -1) { out.write(buf, 0, len); } }
