The thing is, I often quarrel with her about trifles, and after that I have an unpleasant feeling of anxiety. So I thought: maybe I'm punishing her in this way? After all, when you are in a quarrel, you no longer feel guilty, but on the contrary. And then when we make up, you feel so guilty that you want to vanish into thin air. So how do you fight it? How do you stop resenting her? You probably take these kinds of quarrels very personally. When you quarrel with your loved one, you can not help but be offended. So you're looking for an excuse to hurt him badly. What to do in such a case? First of all, do not dwell on the quarrels. It is necessary to understand that you have every right to be offended, and your offense should not go beyond what is allowed. Learn to forgive and not hold a grudge, because the offense takes your energy. If you start to get angry, you will have no strength to go on, and you just might lose a loved one. If you were offended, it's better to be the first to go to the reconciliation, because the offended person is always suffering and suffering. And it's not because he does you wrong, but because he just does not get your attention. No need to hoard resentment and should not keep them in, it will only lead to illness. No need to wait until the offender himself comes to you and make up. You have to do the first step. Remember that all the offense and quarrels just take away your energy and do not give to develop and move forward. You can solve everything on your own. Each of us has difficult situations in life. Of any, even a hopeless situation is always a way out. So do not worry about nothing. You will be fine, I believe in you. You can change everything yourself, you just need to want to. And everything will work out. You yourself must take the first step. Remember that all the resentment and quarrels just take away your energy and do not give to develop and move forward. You can solve everything on your own. Each of us have difficult situations in life. We are afraid of change, what if it is not for us? We are afraid to start a new business without thinking about what will happen next? Are we afraid of not being understood or judged? Are we afraid of the unknown? Often in our lives we tell ourselves, -I can't, I'm afraid, I'm not sure. We're afraid that we won't make it, that we won't have enough strength and resources. We spend most of our lives in this state. All of our problems and fears come from that. But if you look at everything differently, you can see that we ourselves are to blame for all our problems. fffad4f19a
